Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 855.862.5873. Investment performance reflects fee waivers, expenses and reimbursements in effect. In the absence of such waivers, total return and NAV would be reduced. Returns greater than one year are annualized.

RISK FACTORS

Investing involves risk. Principal loss is possible. There can be no assurance that the Fund will achieve its investment objective. Below-investment grade and unrated securities in which the Fund will invest will subject Fund stockholders to greater levels of credit risk, call risk and liquidity risk than funds that do not invest in such securities. Generally, lower-rated or unrated securities of equivalent credit quality offer a higher return potential than higher-rated securities but involve greater volatility of price and greater risk of loss of income and principal, including the possibility of a default or bankruptcy of the issuers of such securities. An investment in the securities of financially distressed issuers can involve substantial risks. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund currently intends to use leverage to seek to achieve its investment objective. Leverage creates risks that may adversely affect the return for the holders of common stock. The Fund may invest in securities of companies in an “emerging market.” Investments in emerging market securities involve a greater degree of risk than, and special risks in addition to the risks associated with, investments in domestic securities or in securities of foreign developed countries.
