Current performance of BII may be lower or higher than the performance quoted. The investment records provided are illustrative only and should not be taken as an indication of BII's expected or actual performance or future rates of return. There can be no guarantee that BII will achieve comparable returns to those illustrated on this page, or at all. Potential investors should place no reliance on this illustrative information. Please refer to BII's Offering Document and sub-fund supplement (together, the "Offering Document") before making any final investment decisions.

The functional currency of BII is USD (\$). Note that where the functional currency of a fund differs from USD, an investor's return will be subject to exchange rate fluctuation risk.

Total Returns are calculated as the percentage change in the NAV per unit, from the beginning of the applicable period, plus the amount of any net distribution per unit declared in the period. Total returns are not a measure used under IFRS. Total return is calculated after the subtraction of expenses, including management and trail fees, where applicable. All returns shown are net of all BII expenses, including general and administrative expenses, transaction-related expenses, management fees, incentive fees and unit-class-specific fees.

BII

ENDNOTES

- ¹ BII is a sub-fund of Brookfield Infrastructure Income Fund FCP-RAIF, a Luxembourg mutual investment fund (fonds commun de placement) organized as a multi-compartment reserved alternative investment fund (fonds d'investissement alternatif réservé).
- ² Total Asset Value is measured as the current value of BII's total assets, including the value of all portfolio investments held, valued in accordance with the policies and procedures further described in the Offering Document. The functional currency of the Fund is USD (\$).
- ³ Net Asset Value (NAV) comprises Total Asset Value less any liabilities, including Fund-level debt (excluding portfolio investment debt), accrued fees and expenses of the Fund, and distributions to be paid in connection with permitted redemptions. For information on how BII calculates NAV, see the "Calculation of Net Asset Value" section of the BII Offering Document.
- ⁴ Investments represent the assets, excluding the liquid portfolio, held by the Fund directly or indirectly through BII Evergreen FCP-RAIF—BII Evergreen FCP-I, a sub-fund of BII Evergreen FCP-RAIF, a Luxembourg mutual investment fund (fonds commun de placement) organized as a multi-compartment reserved alternative investment fund (fonds d'investissement alternatif réservé à compartiments multiples) ("BII Evergreen"), which invests all of its assets (subject always to BII Evergreen's investment restrictions and applicable law and regulation) into interests in Brookfield Infrastructure Income Fund Inc. ("BII U.S."). Figures shown are calculated by reference to the holdings as of the stated month-end. The Fund may invest in different underlying funds managed or advised by the Investment Manager and/or no longer invest in BII U.S. or make some or all of its investment directly from time to time. Hereinafter, the foregoing is referred to as the "Economic Exposure" of the Fund.
- ⁵ Asset Allocation reflects the Economic Exposure of the Fund and is measured as the gross asset value of each asset category (private infrastructure equity investments, private infrastructure debt investments and the liquid portfolio) against the total asset value of private infrastructure equity investments, private infrastructure debt investments and the liquid portfolio. Private infrastructure equity investments include preferred equity investments. Liquid Portfolio under Asset Allocation refers to the Fund's allocation to public securities, term deposits and cash equivalent holdings. The Liquid Portfolio is net of redemption requests received and valued by the Fund as of the applicable valuation date. Committed capital reflects the expected capital deployment over the next three months, based on private investments that have been signed or are in the closing stages. Sector and Geography are measured as the gross asset value of each private asset category (private infrastructure equity investments and private infrastructure debt investments) against the total gross asset value of private infrastructure equity investments and private infrastructure debt investments. Totals may not sum due to rounding.
- ⁶ NAV per unit is calculated by dividing the Fund's Net Asset Value by the total number of units outstanding at the time the determination is made. For information on how BII calculates NAV per units, see the "Calculation of Net Asset Value" section of the BII Offering Document. The denominators presented are based on the number of units in issue as of the date of this document and exclude any redemptions as of month-end.
- ⁷ Monthly Net Distribution: Reflects Class F's current month's distribution per unit (as declared, regardless of whether or not paid). Future distributions are not guaranteed and may be sourced from sources other than cash flows from operations.
- ⁸ Net Distribution Rate (annualized): Reflects Class F's current month's distribution per unit annualized and divided by the prior month's NAV per unit. NAV-based calculations involve significant professional judgment. For further information, please refer to the "Calculation of Net Asset Value" section of the Offering Document, which describes the valuation process and the independent third parties who assist BII.
- ⁹ Total Returns: The returns have been prepared using unaudited data and valuations of the underlying investments in the BII portfolio, which are estimates of fair value and form the basis for BII's NAV. Valuations based upon unaudited reports from the underlying investments may be subject to later adjustments, may not correspond to realized value, and may not accurately reflect the price at which assets could be liquidated.
- ¹⁰ Represents assets under management (AUM) attributable to Brookfield Infrastructure and Renewable Power lines of business as of December 31, 2025. AUM refers to the total fair value of assets managed by Brookfield. Infrastructure AUM includes \$5B of AUM attributable to Brookfield Public Securities Group LLC ("PSG"). Operating Employees as of December 31, 2025. Operating Employees refers to Brookfield, its publicly traded affiliates, Brookfield Infrastructure Partners L.P. and Brookfield Renewable Partners L.P., and related operating businesses and portfolio companies. Personnel figures are inclusive of Oaktree employees that will become Brookfield employees following the completion of the Oaktree acquisition, which is expected to close during the first quarter of 2026. Number of countries represents Brookfield Corporation and its affiliates.
- ¹¹ Investments represent the underlying assets responsible for the Economic Exposure of the Fund.
- ¹² See footnote 4. The Fund may invest in different underlying funds managed or advised by the Investment Manager and/or no longer invest in BII U.S. or make some or all of its investment directly from time to time.
- ¹³ Subject to such higher initial subscription amounts as required for a unitholder's eligibility under applicable law.
- ¹⁴ The Fund intends, but is not obligated, to conduct quarterly redemptions, and it may suspend quarterly redemptions in its sole and absolute discretion at any time. The Fund may, in the sole discretion of the Management Company or its delegate, waive or reduce the redemption fee.
- ¹⁵ The Management Fee is payable monthly in arrears as of the last business day of each month at a rate equal to 1/12 of 1.25% of the relevant month-end NAV. In respect of each fund or other vehicle managed or advised by Brookfield Asset Management Inc. or its affiliates (including BII U.S.) that the Fund invests in (a "Brookfield Group Vehicle"), the calculation of the Management Fee payable by the Fund will be adjusted to exclude the proportion of the Fund's NAV that is invested in a Brookfield Group Vehicle.
- ¹⁶ The existence of an entitlement to a Variable Management Share in the circumstances described in the Offering Document may create an incentive for the manager to cause the Fund, BII Evergreen and BII U.S. to make investments that are riskier or more speculative than it would otherwise make in the absence of such performance-based compensation.
- ¹⁷ The Variable Management Share is calculated monthly and payable annually in arrears at the rate equal to 12.5% of Fund income. Fund income that is attributable to a Brookfield Group Vehicle will be excluded from the calculation of the Variable Management Share.
- ¹⁸ \$125,000 or the equivalent in any other permitted currency, if applicable, of €100,000 at the time of subscription, or a lesser amount in the sole and absolute discretion of the Management Company (subject always to an absolute minimum initial subscription of £50,000 (or the equivalent in any other permitted currency at the time of subscription)).

DISCLAIMERS

This is a marketing communication. For eligible investors only. Please refer to the Offering Document prepared in respect of it before making any final investment decisions. All information is as of the stated month-end, unless otherwise indicated, and may change materially in the future.

This communication is not intended to and does not constitute an offer or solicitation to sell or a solicitation of an offer to buy any security, product, investment advice or service (nor shall any security, product, investment advice or service be offered or sold) in any jurisdiction in which Brookfield Private Wealth LLC or any other applicable affiliate of Brookfield Asset Management Inc. is not licensed to conduct business, and/or an offer, solicitation, purchase or sale would be unavailable or unlawful. No offer or sale of any security, product or fund may be made except in accordance with the Offering Document and/or other disclosure document applicable to such security product and/or fund.

SUMMARY OF RISK FACTORS

An investment in units of BII involves a high degree of risk. These units should only be purchased if you can afford to lose your complete investment. Please read the Offering Document for a description of the material risks associated with an investment in BII. These risks include, but are not limited to, the following:

- BII has a limited operating history, and its operating history should not be relied upon due to the changes to its business. There is no assurance that BII will be able to successfully achieve its investment objectives.
- BII has only made limited investments to date, and you will not have the opportunity to evaluate its future investments before BII makes them.
- Since there is no public trading market for units of BII, redemption of units will likely be the only way to dispose of your units. BII's unit redemption plan will provide investors with the opportunity to request redemption on a quarterly basis, but BII is not obligated to redeem any units and may choose to redeem only some, or even none, of the units that have been requested to be redeemed in any particular quarter in its discretion. In addition, redemptions will be subject to available liquidity and other significant restrictions. Further, BII's Management Company may modify, suspend or terminate the unit redemption plan if it deems such action to be in the Fund's best interest and the best interest of unitholders.
- As a result, the units should be considered as having only limited liquidity and at times may be illiquid.
- BII cannot guarantee that it will make distributions, and if it does, distributions will nevertheless only be available to unitholders holding units in certain unit classes. There is no assurance that BII will pay distributions in any particular amount, if at all. Any declaration of distributions to unitholders will be made in accordance with applicable law.
- Subscription and redemption prices for units of BII will generally be based on the NAV at close of business on the last business day of the immediately preceding month (subject to material changes as described in the Offering Document) and will not be based on any public trading market. While there will be annual appraisals of BII's investments, the appraisal of such investments is inherently subjective, and its NAV may not accurately reflect the actual price at which its assets could be liquidated on any given day.
- BII has no employees and is dependent on the Investment Manager to conduct its operations. The Investment Manager will face conflicts of interest as a result of, among other things, the allocation of investment opportunities among BII and other Brookfield funds and accounts, the allocation of time of its investment professionals, and the substantial fees that BII will pay to the Investment Manager.
- This is a "best efforts" offering. If BII is not able to raise a substantial amount of capital in the near term, its ability to achieve its investment objectives could be adversely affected.
- There are limits on the ownership and transferability of BII's units.

- BII's operating results will be affected by global and national economic and market conditions generally and by the local economic conditions where its investments are located.
- BII is not managed in reference to any benchmark index.

You should carefully review the "Risk Factors and Other Considerations" section of the Offering Document for a discussion of the risks and uncertainties that BII believes are material to its business, operating results, prospects and financial condition. Except as otherwise required by applicable securities laws, BII does not undertake to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

FUTURE PERFORMANCE

Past performance is not indicative of future performance, and the value of investments and the income derived from those investments can fluctuate. Future returns are not guaranteed, and a loss of principal may occur.

Diversification does not ensure a profit or protect against loss in a declining market.

Although this information is forward-looking by its nature and actual results are likely to differ, perhaps materially, from these estimates, Brookfield believes that the estimates have a reasonable basis.

Information herein contains, includes or is based on forward-looking statements. Forward-looking statements include all statements, other than statements of historical fact, that address future activities, events or developments, including, without limitation, business or investment strategy or measures to implement strategy, competitive strengths, goals, expansion and growth of our business, plans, prospects and references to our future success. You can identify these statements by the fact that they do not relate strictly to historical or current facts. Words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "seek" and other similar words are intended to identify these forward-looking statements. Forward-looking statements can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining our actual future results or outcomes. Consequently, no forward-looking statement can be guaranteed. Our actual results or outcomes may vary materially. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

As stated, this document is subject to the assumptions (if any) and notes contained herein. Any changes to assumptions could have a material impact on projections and actual returns. Actual returns on unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs, and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained herein are based. Accordingly, the actual realized returns on unrealized investments may differ materially from the returns indicated herein. Brookfield will provide more detailed information on the material factors or assumptions that were applied in making the projections and the material factors that could cause actual results to differ materially from the projections to any investor on request.
